Improvement Initiatives Rationale

Goal 1:
2017 NAPLAN data - Whilst overall achievements in year 3 got closer to state levels, in year 5 the gap increased. The data also indicated decreased achievement in the top two bands in year 3 and year 5 writing. Relative growth in writing remained static at the high end, but numbers increased significantly in low growth.

Goal 2:
2017 NAPLAN data - Whilst overall achievements in year 3 decreased further behind state levels, in year 5 there were no gains on state levels achieved. The data also indicated slight increase in achievement of the top two bands in year 3 and a decrease year 5 mathematics. Slight improvement in relative growth in mathematics.

Goal 3:
Whilst a number of improvements were put in place in 2017, (e.g., positive education program, establishment of a wellbeing curriculum, the provision of more targeted support for students with identified needs), it is considered appropriate to have continued focus in this area.
